Winkonlaser

What is RenaShape?

It reduces cellulite by targeting the root cause, improving lymphatic drainage and circulation, breaking down fibrous septae, relieving pain and inflammation, and toning the muscles. It is the only device in the world that uses an innovative COMPRESSIVE MICROVIBRATION technology to feel the body and produce a customized treatment to tone, tighten and smooth out imperfections.

The RenaShape's System Highlights

✓ EFFECTIVE

In a competitive cosmetic industry, RenaShape is a 100% non-invasive method with no downtime and uses the latest technology to make treatments enjoyable and effective.

✓ PROVEN

In clinical observations of 656 patients, RenaShape improved cellulite by 39% and had a 97.8% customer satisfaction rating.

✓ NON-INVASIVE

It is a globally recognized treatment for the body and face. It's a non-invasive treatment that delivers 5 synergistic actions; cellulite reduction, enhanced lymphatic drainage, stimulation of blood flow, reduced aches and pains, and increased muscle tone.

Synergetic Technologies. Superior Results.

By cleverly combining both microvibration and microcompression technology, RenaShape triggers the break down of fibrous septae and accelerates lymphatic drainage. The handpiece uses 55 rotating spheres, which produce a pulsed rhythmic action on the tissues which contours problem areas such as the legs, arms, and stomach. The harmonious balance between pressure and frequency introduces a precise micro-vibration on the epidermis deep into the muscle.

Improve cellulite
Reshapes the silhouette,
smoothes the skin

Draining action
Eliminates toxins and
accelerates lymphatic drainage

Vascular action
Activates blood flow and
